- Q1 2014 production was adversely affected by grade dilution and lower tonnage
- Metallurgical recoveries remained high, increasing from 93.4% in Q4 2013 to 93.6%, notwithstanding the lower feed-grade

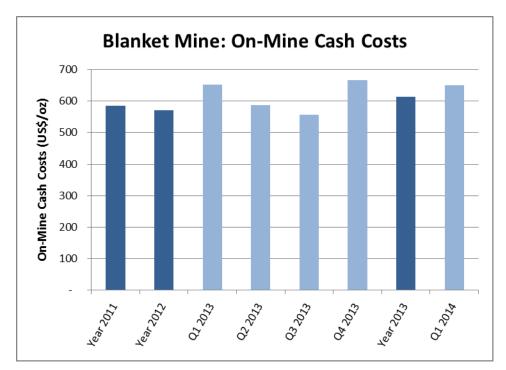

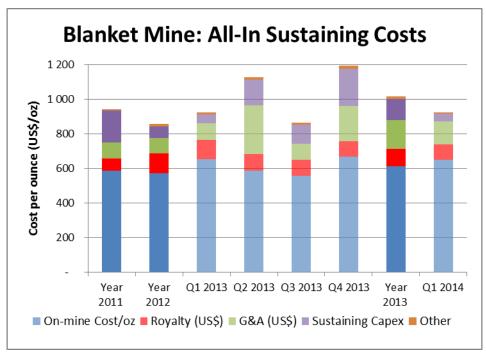

## Q1 2014 Results Production – Grade Dilution

- Q1 2014 production was adversely affected by lower grade and tonnages
- Grades adversely affected by low-grade zones and dilution arising from over-drilling of fans.
  - Fan drilling was adopted in Q3 2013 on safety grounds at that time.
  - The longhole-stopes have been re-designed with foot-wall and hanging-wall drives for improved access and safety. The contacts are now drilled with parallel holes and the centre is then taken out with fan holes.
- Production also adversely affected in Q1 due to the premature requirement to replace the ropes on the No. 4 Shaft
- Management re-iterates production 2014 production guidance of approximately 48,000 ounces
  - The reasons for grade dilution have been identified and are being addressed
  - New mining areas are being developed to increase mine flexibility and alleviate logistical challenges on 22 -Level

## Cross Section Showing LONGHOLE PRACTICES AT BLANKET MINE

- On-mine cash costs remain stable and benefit from the sale of WIP brought forward from 2013
- AISC benefits from lower G&A and reduced sustaining capex
- Over 65% of Blanket's costs and all corporate overheads are fixed: as production increases later to 2014 to achieve the targeted production, it is anticipated that costs will remain low

<sup>\*</sup> Adjusted EPS excludes share based expenses, impairment, foreign exchange profit/loss, deferred taxation and non-recurring withholding tax. EPS has also been adjusted to reflect the share consolidaton which was implemented on April 12, 2013

- Revenues and royalty lower due to the lower gold price
- G&A increases Q-on-Q reflecting Caledonia's strengthened management team in Q3 of 2013
- Other income relates to FX gain on cash balances (reversed out of adjusted eps)
- Taxation is income tax and withholding tax on payments from Zimbabwe

- Increase in fixed assets reflects continued investment at Blanket particularly expansion investment at the satellites (GG and Mascot) and the No. 6 Winze
- No work-in-progress at end of Q1 (Dec 2013, \$871k); stocks of consumables increased in Q1 to support continued activity on the investment projects
- Trade receivables little changed from December but the component attributable to bullion sales has reduced due to faster payment from Fidelity
- Zimbabwe overdraft facility undrawn
- Of the total cash at March 31 2014, \$26.2m is held outside Zimbabwe
