CONSTRUCTING A NEW MINE BELOW THE CURRENT WORKINGS

# Solar PV Project

OUR DRIVE TOWARDS A MORE SUSTAINABLE FUTURE

**APPROVED THE CONSTRUCTION OF A 12MW SOLAR PLANT AT A COST OF APPROXIMATELY \$14 MILLION**

- Expected to provide approximately 27% of Blanket's total daily electricity demand: reduce Blanket's dependence on grid power and improve the quality and security of Blanket's electricity supply
- Blanket's tropical location and altitude are favourable for Solar PV
- Funding was secured through the issue of equity via an ATM fundraise on the NYSE American in August 2021
- Voltalia, a major player in the renewables energy sector, has been appointed as the lead contractor
- Project delayed by 4 months due to COVID-19
- Plant is expected to be operational in June 2022
- The project is expected to reduce Caledonia's GHG emissions, improve reliability and provide a modest increase in shareholder returns

# New Opportunities

# The Zimbabwe Opportunity

CALEDONIA IS ACTIVELY PURSUING NEW OPPORTUNITIES IN ZIMBABWE

Zimbabwe has historically produced over **45 million ounces** of gold

Prior to 2000, Zimbabwe produced more gold than Mali, Tanzania, Burkina Faso, the DRC and Guinea

Several prolific gold belts with potential for further multi million-ounce discoveries

# The Zimbabwe Opportunity

MALIGREEN

**Purchased** the mining claims over the project situated in the **Gweru mining district**

The total cash consideration of **\$4 million**

The property contains a **NI 43-101 compliant inferred mineral resource** of approximately **940koz\***

Significant **historical exploration & evaluation work conducted** on the property

# Zimbabwe

SINCE MUGABE THE GOVERNMENT HAS BEEN TRYING TO IMPROVE THE COUNTRY'S BUSINESS CLIMATE AND MAKE IT MORE ATTRACTIVE TO INVESTORS

- Indigenisation requirement for all mines to be 51% owned by indigenous shareholders was scrapped in March 2019
- Exporters listed on the Victoria Falls Stock Exchange retain 100% of FOREX earned on incremental output
  - For Caledonia this is all gold production over 57,000 ounces
- Including the royalty requirement, Blanket has a total effective tax rate of about 29.5% which is slightly lower than for gold producers in South Africa
- In 2021 Zimbabwe received its highest ever FOREX inflows of US\$ 9.7 billion, this was a 54% increase on 2020
- Zimbabwe allows full deduction of capital expenditure against income when incurred or when taxable income becomes available. This makes Zimbabwe, like South Africa, one of the few global tax regimes where 100% mining capital deductions are allowed in the year they are incurred.
- Under the Special Economic Zones legislation, investors operating in designated special economic zones can import raw materials and machinery duty-free.

# Outlook

A COMPANY IN THE ASCENDANCE

# Caledonia's Vision

Target production from Central Shaft of 80,000 ounces a year

Balance returning money to shareholders and investing in the Company's growth.

Continues to evaluate investment opportunities in Zimbabwe and elsewhere to de-risk the business from being a single asset producer.

The strategy will focus on becoming a multi-asset gold producer
